

LISA ANDREWS

Actively working on solving the Global Grand Challenges.

LISA ANDREWS

"Technology is advancing at a fast pace, we have the access and the ability to make a huge impact on the world with just one idea and the right support. I live to help businesses and our community think bigger."

Lisa Andrews is a professional investor working on solving the Global Grand Challenges by encouraging businesses and other entrepreneurs to think bigger in having a positive impact on the world. Lisa is driven by empowering people with technology to have a positive impact on humanity.

CEO and Co-Founder
WAVIA

Lisa co-founded WAVIA in 2019, a Venture Capital Fund investing in global impact and sustainable startups with compelling financial returns. The WAVIA platform removes the friction of financial, human and community capital, focusing on the 17 sustainable development goals (SDGs) identified by the United Nations.

Co-CEO
SingularityU Australia

Lisa is the Co-CEO of SingularityU Australia - a global learning and innovation community using exponential technologies to tackle the world's biggest challenges and build a better future for all. We connect, collaborate, converse, and converge community to bring sustainability through exponential technologies to solve pressing global challenges.

CEO
Ignite Alliance

Lisa founded Ignite Alliance in 2012 after realising that business owners could use a lot more practical advice and assistance when experiencing significant growth. Ignite provides services including high level consulting, finance team services, innovation services (research and development and export grants) and an incubator support program that provides angel investment for aspirational technologies that will have a positive impact on the world.

KEYNOTE TOPICS

Technologies of the Future

10 mins, 20 mins, 30 mins, 60 mins + 15 min Q&A

For CEOs and Senior Leaders, Entrepreneurs or students. The session will cover our expectations of technologies that we will see in our daily lives in the next 10 years including; nanotechnology, bionics, robotics, artificial intelligence, networks, sensors, AR and VR. The convergence of these will show unprecedented opportunities for businesses and leaders to use technology to solve some of the world's biggest problems.

Key takeaways

- Insight into some of these technologies that exist now;
 - Predictions of new technologies for the next 20 years;
 - Inspiration and empowerment to implement something new in your business.
-

The Evolution of Humans and the Future of Business

10 mins, 20 mins, 30 mins, 60 mins + 15 min Q&A

Humans have evolved over the past 65000 years to where we are currently, however the next 100 years will see an unprecedented change at an exponential pace, are you ready?

Now, more than ever, is the time to think outside of the box about the role and power of technology and how it could be better applied to the world you work in. From nanotechnology, bionics, and robotics to artificial intelligence, networks, sensors, AR and VR, the technologies used in our daily lives in the next decade are increasing at an alarming rate. While technology can be used to solve some of the world's biggest problems, the convergence of tech and what this means for businesses and leaders also presents a huge opportunity.

CEO and futurist Lisa Andrews will give an insight into some of these technologies that exist as well as explore the mindset that will be required to execute on a new type of strategy. Expect to come away feeling inspired and empowered to implement something new to future proof your business.

Keynote Topics

A Future of Perfect Knowledge

10-15 mins

The pace of technological progress is accelerating at an exponential rate. Nanotechnology, bionics, robotics, AI, VR/AR, networks and sensors will impact every person, organisation and industry in the next ten years.

Making sense of this rate of change requires a new framework for strategic thought. Imagine the world when we are able to know anything, anywhere, anytime.

This session surveys the future of technological developments and covers how human, financial and community capital will shift to a world of new business models driven by profit with purpose.

Introduction to Exponentials

10 mins, 20 mins, 30 mins, 60 mins + 15 min Q&A

Singularity University was founded on the idea that there are a multitude of technologies out there that are changing at an exponential pace. In this session we explore the range of technologies for which exponential holds true and the implications this has on industry.

Impacting a Billion People

10 mins, 20 mins, 30 mins, 60 mins + 15 min Q&A

500 years ago only Kings and Queens could impact a billion people, 200 years ago it was the Industrialists, today it's you and me.

Mindset is key to understand the shift needed from linear to exponential foresight.

Learn how exponential technologies such as AI, robotics, nanotechnology, AR/VR, networks and sensors could be used to scale your business for an exponential impact.

Exponential Business Models

30 mins, 60 mins + 15 min Q&A

In this session Lisa will discuss the evolution of business models including Exchange, Not for Profit, B Corp and Profit with a Purpose as well as using distributed ledger technologies to solve Global Grand Challenges.

Key takeaways

- Open with the countdown to the singularity - what will humans need / we're all in the business of enhancing the human experience;
- The evolution of business models - exchange, not for profit, B Corp, now profit with purpose types (real-time nano transaction distribution of basic needs) and examples of businesses doing this;
- Using distributed ledger technologies to solve the global grand challenges.

Building your Financial Roadmap

1 hr, 2 hrs

Getting a start up funded can be a complicated process. In this session you will learn about the 6 primary sources of funding and various methods to acquire funding.

Key takeaways

- The 6 primary sources of funding;
 - How to get your start up/scale up backed;
 - Determining your funding and timeline;
 - Positioning yourself to investors.
-

The Future of Global Finance

30 mins, 60 mins + 15 min Q&A

The Global Distribution of Finance and the ability to have a significant financial impact is reshaping. Learn how businesses can use distributed ledger technology to solve the global grand challenges.

Key takeaways

- The Global Distribution of Finance and the ability to have a significant financial impact is reshaping. Learn how businesses can use distributed ledger technology to solve the global grand challenges;
- UBI;
- Nano Transactions.

Predictive Analysis to create a Fairytale Financial Future

30 mins, 60 mins + 15 min Q&A

Financially focused growth, money, and the new definition of a billionaire. In this webinar we will explore: How humans can evolve to a new future by design where everyone has their universal basic needs met.

The world is changing fast, technological advancements will continue and only get faster.

Imagine a future of perfect knowledge. Devices and sensors that can model our world and articulate the scenario analysis of any decision that you plan to make.

What will this look like for organizations, for their business planning, research and development and strategic implementation.

We will explore:

- What 500 billion devices and 100 trillion sensors could predict;
- The impact of universal basic income;
- What this could mean for businesses now;
- Learn what you can do to play a role in creating this future by design.

Using Data to Solve the Global Grand Challenges

30 mins, 60 mins + 15 min Q&A

- Spaceship Earth;
- United Nations Project;
- Data for good examples.

Keynote Topics

Longevity and Legacy

10-15 mins

A ten thousand year legacy is yours if you're up to the challenge. How can we all be our best selves and make the biggest impact on the world? In this session Lisa will discuss technology and how we can incorporate it as a guide for exponential impact and creating a personal legacy.

- The evolution of Belonging;
 - Philosophy of humanity;
 - The future of civilisations;
 - Longevity;
 - A guide for exponential impact and personal legacy.
-

WORKSHOPS

Local innovation makes the world go-round.

SingularityU Newcastle Chapter

Be Exponenti

Local innovation makes the world go-round.

Local innovation makes the world go-round.

Local innovation makes the world go-round.

Lisa's workshops are customised and highly interactive and run anywhere from 60 mins to 2 full days.

Creating a vision for your personal impact

- Identify where you are at in areas of your personal lives, business and global impact;
- Understand the areas that will unleash their personal impact;
- Create a vision board for their Future By Design.

Financially focussed growth

- How to identify the areas of your business to focus on to have the biggest impact

Global Grants

- The international grants landscape;
- Structuring for purpose;
- Identify, Secure and Administering Grants.

Moonshot Thinking Bootcamp

- What does it mean to be exponential?
- What role must each of us play in creating the future?

Implementing Abundance

- What lies at the intersection of humanity and technology?

Workshops

LOGISTICS AND BOOKING

Lisa travels from Sydney.

ENQUIRY PROCESS

1. CHECK AVAILABILITY

Contact Lisa's Executive Assistant
Kate Marais-Piper kate@ignitealliance.com.au

2. REQUEST A PROPOSAL

All engagements are quoted individually and after a chat with Lisa you will be provided a customised proposal, including speaker fees and travel expenses.

3. APPROVAL AND PAPERWORK

The date is locked in, a contract issued and a deposit paid to secure your date.

4. PRE-EVENT PROCESS

We can provide any assistance with promoting your event, including the production of a teaser video to go out to your delegates. We will also have a detailed briefing and Lisa will conduct industry research where applicable. We also manage all travel and logistics to save you time and hassle.

5. POST-EVENT

We will have a detailed de-brief and Lisa will provide a resources pack for your delegates to extend the learning.
